Counsyl is a health technology company that offers DNA screening and genetic testing for men, women, and their children. The company offers three main areas of testing. Family Prep Screen service that detects various conditions that can be passed from parent to child; carrier screening services; Informed Pregnancy Screen service, which provides early insight into baby's development by screening for chromosome conditions, such as down and turner syndrome; and Inherited Cancer Screen service that analyzes DNA for twenty genes associated with an increased risk of developing cancer.
